

Mikero's Tools Collection

Archive of programs made by Mike Andrew (Mikero)

1. Overview

Mikero's tools are widely used in modding for Bohemia Interactive games. Back in 2015 I was looking for the last version compatible with OFP and Windows XP so I searched the web and downloaded all versions that I could possibly find.

I'm still looking for older versions (2013 and older) so if you have them please send them over.
