

Operation Finnishpoint v0.8

Unofficial Finnish localization for Operation Flashpoint.

1. Overview

Operation Finnishpoint is a game language modification, which changes Operation Flashpoint to Finnish. It adds translation to the stringtables, briefings and to the overviews (for original single- and multiplayer missions).

2. Installation Requirements

- Operation Flashpoint Resistance v1.96 (you won't be able to patch it later)
- 1.27 MB on drive with system (temporarily)
- 174 MB on drive with OFP (temporarily)

3. Installation

Launch *Operation_Finnishpoint.exe*, type 'i' and press enter.

4. Notes

Installer makes backup copies of each modified file, but won't replace already existing backups, so you can install many times.

If you terminate setup process, temporary files won't be deleted.
To get rid of them, launch program once again and type 'q'.

If the game is not in Finnish after installation, open *flashpoint.cfg* in text editor and change language to "Finnish".

Here you can also quickly switch game language back to English. It can be useful, in multiplayer, if you don't want other players to see your radio texts in Finnish

5. Uninstallation

Requirements : Same as installation.

Launch *Operation_Finnishpoint.exe*, type 'u' and press enter. This option will be visible only when you have Finnishpoint installed.

6. Credits

Translation by **Osku** (elisanet.fi/fdf/).

Installer by **Faguss** (ofp-faguss.com).

Installer uses:

- PBO encryptor / decryptor by Amalfi
- PBO encryptor / decryptor by Mikero

7. Version history

v0.8 (19.09.08)

First release.
