This package also contais `Jango_Boba_Fett.rar` which is an unfinished model published on Galaxy At War forums in 2008. I don't remember who was the author.

File `impguns.pbo` (from the Imperial Pack by Mok_Star) collides with `Pcstormtrooper.pbo` (Stormtroopers by Philcommando). They use the same weapon class `Lasermag`.

File `c7_xwing.rar` contains an updated version of the X-Wing addon. It was downloaded from `ofp.gamepark.cz/_hosted/galaxyatwar`

I'm looking for PCtieinterceptor.zip
