

anims.pbo replacement file

Indicate if new Fwatch is running; by Faguss (ofp-faguss.com)

1. Overview

This replacement has a script that will indicate if new Fwatch is running and display version number just after loading the game:

It will not work with version 1.0.

2. Installation

Copy anims.pbo from the Files\`<modfolder>` to the

- Operation Flashpoint\Dta\ folder,
- Arma Cold War Assault\DTA\ folder
- or \@modfolder\dta\

3. Version Check

Script will also perform on-line check once a week if your Fwatch is up to date. If you have Fwatch 1.16 it will look for mod updates. To disable this feature open `Operation Flashpoint\fwatch\mdb\fwatch_version.db` in text editor and change `onlinecheck` value to zero.

4. Version history

v1.0 (15.12.11)

First release.

v1.1 (14.04.12)
